

Technical Data Sheet

Fulviplus Regal - Fulvic Acid Powder

Fulviplus Regal has higher bioactive groups, and strong chelating to the trace elements. It is highly recommended to apply as the pesticide adjuvant, increase the pesticide efficiency, or to formulate high concentrated foliar fertilizer & flush fertilizer.

Specification

Appearance:	Dark Brown Powder	Water Solubility:	Completely
pH Value:	5-7	Total Fulvic Acid:	95%
Moisture:	12%	Heavy Metals:	50ppm

Features

Soluble Completely in Water
Soluble at wide pH range
High Fulvic Acid Content

Possible Benefits

Increase pesticide efficiency
Stimulate the plant growth
No deposit in liquid fertilizer
Stable chemical properties

Recommended Application

Foliar: 1.5kgs/ha

Package and Storage

25kgs Paper Bag & Customized
Keep in a clean, dry and well-ventilated place.
